Claim Audits That Deliver Clarity, Control, and Confidence

Verus

Verus delivers configurable claim audit solutions designed for the complexities of mass tort and class action litigation. Our team combines industry-leading expertise with audit programs that align to your firm's specific claims and data challenges. We provide comprehensive compliance oversight to identify and mitigate operational, regulatory, and strategic risks—from data integrity to process reliability. And we go beyond reporting, offering actionable insights through visual dashboards, executive summaries, and impact analyses that help you make informed, defensible decisions. Built on two decades of experience, Verus audits strengthen your processes, protect your reputation, and ensure every claim stands on credible, verifiable data.

Strategic Compliance Planning

Verus will analyze your claims handling process to gain a better understanding of the nuances of regulatory and operational matters that could create risk for you and your clients – and then design and implement a meticulous testing plan to reduce that risk.

Operational Compliance Audit

Our team works with you to develop compliance audits intended to improve the quality of data relied upon to validate claims by carefully mapping the data collection process and developing a sampling methodology to verify accuracy at each critical decision point. Our approach identifies failure points early, and our team recommends improvements to correct issues before they become problems that affect your portfolio.

Regulatory Compliance Review

Our audit team has expertise in regulatory requirements that impact our clients and designs programs to ensure compliance. Our expertise includes:

- California Consumer Privacy Act (CCPA) & General Data Protection Regulation (GDPR) data privacy/security requirements
- Medicare, Medicaid, and SCHIP Extension Act (MMSEA) reporting obligations for settling parties
- Healthcare-lien compliance and associated vendor/data risks

Reporting & Follow-through

Verus provides detailed reports, and we spend time with our clients to make sure findings are understood and action plans to address issues are developed in close collaboration.

- Visual Reporting: Our visual reports simplify complex data, providing actionable insights that enable clients to refine their processes and achieve better outcomes.
- Expert Interpretation and Impact Analysis: Our reports include clear executive summaries to ensure clients fully grasp the implications of our recommendations and the positive impact these changes will have.

WHY VERUS

- 40% of our clients rely on us for Claim Audit Services to verify the reliability and credibility of data sourced from other parties.
- Decades of experience in complex litigation management and settlement administration
- Managed over 8.7 Million claims
