

Zantac Census Plus Deadline: We Have You Covered.

Verus can help your firm manage your Zantac® cases through our state-of-the-art web portal. The Verus' Zantac Census Plus platform subscription supports law firms by helping them achieve key objectives:

- Drive Down Cost with Increased Safety

- Web based, mobile ready
- White labeled client deployment (look & feel resembles your firm's communications)
- Customized data reporting
- Electronic signature integration

- Increase Quality

- Question validations for accuracy of data capture
- Case management system APIs
- Quality control reporting
- Streamlined interface for ease of use

The Solution at Work:

Our web portal offers the range of tools needed to complete, coordinate and organize all claimants' information.

A screenshot of the Zantac Census Plus Form web portal. The interface is white with a green sidebar on the left containing navigation links: 'Zantac', 'Demographic Information', 'Usage Information', 'Injury Information' (highlighted), 'Documents', and 'Certification'. The main content area is titled 'Zantac/Ranitidine Injury Information' and includes a 'Draft' button. It contains several form fields: 'Risk Factors' (a dropdown menu), 'Did you experience wage loss as a result of your injury(ies)?' (a dropdown menu), 'Please identify the lost wages' (a text input field with '\$10' entered), 'Were you diagnosed with any type of cancer before you began using Zantac/Ranitidine?' (a dropdown menu with 'Yes' selected), 'Indicate the user's alleged injury(ies) the plaintiff(s) claims were caused by Zantac/Ranitidine usage' (a dropdown menu with 'Other' selected), and 'Please Specify' (a text input field with 'Other Details' entered). Below these fields is a 'Cancer Details' section with a table. The table has columns: 'Type of Cancer', 'Date of Diagnosis', 'Initial Diagnosis Date', 'Stage of Cancer at Diagnosis', 'Stage of Cancer Currently', and 'Status'. The table contains one row with the following data: 'Yes', 'Name', 'Name', 'Name', 'Name', and 'Status'. There are 'Add', 'Draft', and 'Print' buttons at the bottom right of the form.

Streamlined navigation allows claimants to enter information directly onto the platform which allows for easy retrieval and case look up.

Claimants are able to access their unique file, upload documents and sign their certification directly on the platform.

Subscription Details:

By working with Verus, your firm receives a dedicated solution that fits your specific needs. Our platform subscription provides access to a customized Zantac portal that puts the power of technology-enabled tools in your hands with the flexibility to handle more traditional client responses. Subscriptions are billed on a monthly basis with a 30-day cancellation policy, if circumstances change. While simple and easy, the impact across your case inventory is immense. Once on our platform, we can offer preferred pricing for any additional services like claimant communication, upload assistance into the MDL and any other service to support the scaling of your operations. If your staff can handle your current case volume, then the subscription is all you need. Call Dan Comunale today at 908.239.1895 to discuss access to our Zantac platform.

Additional Services:

The Verus team also provides the following Zantac services:

- Upload of cases into the MDL document repository
- Proof of use review
- Medical record management and review
- Claimant communications

Why Verus?

- Experienced reviewers supported by registered nurses who specialize in analyzing the requirements of mass tort claims
- Proprietary software platform that allows rapid deployment of customized review and re-reporting solutions
- Financial benefits including flexible payment plans.

About Us

Verus LLC is a litigation support service firm that provides a full suite of services, including Case Management & Medical Review Services, Settlement Administration, Business & Advisory Services, Analytics and Document Management Services, to mass tort lawyers. We employ almost 100 U.S.-based attorneys, nurses, accountants, statisticians and claims adjusters, operations experts, and hardware and software engineers to help mass tort attorneys improve operating results and maximize recoveries for their clients.
